74-734 - Municipal sewage pumping stations

LAST AMENDED

2/2/2011

In all #Residence Districts#, the City Planning Commission may permit municipal sewage pumping stations provided that there are serious difficulties in locating it in a district where it is permitted as-of-right. The Commission may prescribe appropriate conditions or safeguards to minimize adverse effects on the character of the surrounding area including safety devices and the concealment of such #use# with fences, buffer zones, barriers or other screening devices and landscaping.

As a condition of granting a special permit for a municipal sewage pumping station, the Commission shall find:

- (a) that the proposal promotes and protects the public health, safety and general welfare; and
- (b) the sewers and treatment plants to which the flow is to be pumped will be adequate to accommodate anticipated future development in the area to be served by these facilities.
