26-40 - STREET TREE PLANTING AND PLANTING STRIP REQUIREMENTS

File generated by https://zr.planning.nyc.gov on 11/18/2026

26-40 - STREET TREE PLANTING AND PLANTING STRIP REQUIREMENTS

LAST AMENDED
4/30/2008

26-41 - Street Tree Planting

LAST AMENDED
12/6/2023

In accordance with applicability requirements of underlying district regulations, one #street# tree, pre-existing or newly planted, shall be provided for every 25 feet of #street# frontage of the #zoning lot#. Fractions equal to or greater than one-half resulting from this calculation shall be considered to be one tree.

(a) Design criteria

#Street# trees shall be planted along the entire length of along the curb of the #street# adjacent to the #zoning lot#, within:

(1) tree beds or connected tree beds designed in compliance with standards set forth by the Department of Parks and Recreation; or

(2) rain gardens designed in compliance with standards set forth by the Department of Environmental Protection.

For #zoning lots# with over 100 feet of #street# frontage, wherever two required #street# tree beds will be separated by less than 25 feet, such tree beds shall be combined and designed as a single continuous tree bed.

The species and caliper of all #street# trees shall be determined by the Department of Parks and Recreation, and all such trees shall be planted in accordance with the #street# tree planting standards of the Department of Parks and Recreation.

(b) Alternate compliance

Where such tree planting would be infeasible adjacent to the #zoning lot#, such trees may be provided in an alternate manner, or waived, using any combination of provisions, as appropriate, set forth in this paragraph (b).

(1) Rain gardens

Where the Department of Parks and Recreation determines that such tree planting would be infeasible, such required #street# tree may be substituted for a rain garden designed in compliance with standards set forth by the Department of Environmental Protection.

(2) Planters

Where the Department of Parks and Recreation or Department of Transportation determines that below-grade infrastructure causes one or more tree planting location to be infeasible, such tree may be provided in permanent planters designed in compliance with standards set forth by the Department of Transportation.

(3) Off-site locations

Where the Department of Parks and Recreation determines that such tree planting would be infeasible, or in historic districts where the Landmarks Preservation Commission determines that such tree planting would not be in character with the historic district, one or more #street# trees may be planted in an alternative off-site location, to be selected by the Department of Parks and Recreation, except that if the Department of Parks and Recreation determines that no alternative location is available, or if no alternative location is provided within 30 days of an application for a Department of Parks and Recreation

permit, such off-site tree shall be waived. Off-site trees shall be planted at alternative locations within:

(i) an existing empty #street# tree pit or planting strip; or

(ii) an unpaved area owned by the City of New York.

All such alternative locations shall be within the Community District or one-half mile of such #zoning lot#.

(4) Payment option

Where the Department of Parks and Recreation determines that such tree planting would be infeasible, or in historic districts where the Landmarks Preservation Commission determines that such tree planting would not be in character with the historic district, in lieu of planting an off-site tree in an available alternative location, or in the event that planting adjacent to the #zoning lot# cannot be completed due to the season, funds equivalent to the cost of planting such tree, as established by rule of the Department of Parks and Recreation, may be deposited in an account of the City of New York. Such funds shall be dedicated to the planting of #street# trees by the City at an alternative location or, in the case of an off-season deposit, in front of the #zoning lot# at the next appropriate planting season.

26-42 - Planting Strips

LAST AMENDED
4/30/2012

In accordance with applicability requirements of underlying district regulations, the owner of the #development#, #enlargement# or #converted building# shall provide and maintain a planting strip.

#Street# trees required pursuant to Section 26-41 shall be planted within such planting strip. In addition to such #street# trees, such strip shall be fully planted with grass or groundcover, except as provided in Section 26-421. Such planting strip shall be located adjacent to, and extend along, the entire length of the curb of the #street#. However, in the event that both adjoining properties have planting strips adjacent to the #front lot line#, such planting strip may be located along the #front lot line#. The width of such planting strip shall be the greatest width feasible given the required minimum paved width of the sidewalk on #street# segments upon which the #building# fronts, except that no planting strip less than six inches in width shall be required.

26-421 - Modifications of planting strip requirements

LAST AMENDED
4/30/2012

Driveways are permitted to traverse planting strips. Planting strips may be interrupted by utilities and paved areas required for bus stops.

On #zoning lots# containing #schools#, permeable pavers or permeable pavement may be substituted for grass or ground cover, provided that, beneath such permeable pavers or pavement, there is structural soil or aggregate containing at least 25 percent pore space, or other kind of engineered system that absorbs stormwater, as acceptable to the Department of Transportation. Any area improved with permeable pavers or pavement pursuant to this paragraph shall be no less than three feet in width except where necessary for compliance with the Americans with Disabilities Act.
