## 23-662 - Maximum height of buildings and setback regulations

## LAST AMENDED

## R6 R7 R8 R9 R10

In the districts indicated, height and setback regulations for \#Quality Housing buildings\# are set forth in this Section.
The height of a \#Quality Housing building\# \#or other structure\# shall not exceed the maximum height limit specified for the applicable district set forth in paragraphs (a) or (b) of this Section, as applicable, except as specified elsewhere in this Chapter.

Basic \#building\# heights for \#Quality Housing buildings\# are set forth in paragraph (a) of this Section. Such heights may be increased in certain districts for \#Quality Housing buildings\# with \#qualifying ground floors\# pursuant to paragraph (b)(1) of this Section. For \#Quality Housing buildings\# with \#qualifying ground floors\# in R6A, R6B, R7A, R7D, R7X, R8A, R8X, R9X or R10A Districts located outside the \#Manhattan Core\#, supplemental ground floor provisions are set forth in paragraph (b)(2) of this Section.

A setback is required for all portions of \#buildings or other structures\# that exceed the maximum base height specified for the applicable district in paragraphs (a) or (b) of this Section, and shall be provided in accordance with paragraph (c) of this Section.
(a) Basic \#building\# heights

Table 1 in this paragraph sets forth the minimum and maximum base height, and maximum \#building\# height, for \#Quality Housing buildings\#.

For \#zoning lots\# or portions thereof within 100 feet of a \#wide street\#
For \#zoning lots\# or portions thereof on a \#narrow street\# beyond 100 feet of a \#wide street\# or, for \#zoning lots\# with only \#wide street\# frontage, portions of such \#zoning lot\# beyond 100 feet of the \#street line\#
\#Buildings or other structures\# may exceed a maximum base height of 85 feet in accordance with Section 23-663 (Tower regulations in R9D and R10X Districts)

For \#buildings or other structures\# that front upon an elevated rail line, the maximum base height shall be 25 feet
(b) Special heights in certain districts for \#Quality Housing buildings\# with \#qualifying ground floors\#

Table 2 in this paragraph sets forth the minimum and maximum base height, maximum \#building\# height, and maximum number of \#stories\# for \#Quality Housing buildings\# with \#qualifying ground floors\# within:
(i) R6 or R7 Districts without a letter suffix outside the \#Manhattan Core\# and within 100 feet of a \#wide street\#, or R8 or R10 Districts without a letter suffix within 100 feet of a \#wide street\#; or
(ii) R6A, R6B, R7A, R7D, R7X, R8A, R8X, R9X or R10A Districts located outside the \#Manhattan Core\#.

(2) Supplemental ground floor provisions for \#buildings\# in certain districts

For \#Quality Housing buildings\# in R6A, R6B, R7A, R7D, R7X, R8A, R8X, R9X or R10A Districts located outside the \#Manhattan Core\#, supplemental ground floor provisions shall apply as follows:
(i) Along typical \#street wall\# frontages

For \#buildings\#, or portions thereof, with a \#street wall\# width of 100 feet or less along a \#street\#
frontage, \#uses\# on the first \#story\# shall comply with the ground floor \#use\# and depth requirements of Section 26-52. \#Accessory\# off-street parking spaces on the ground floor shall be wrapped in accordance with the provisions of paragraph (a) of Section $\underline{26-54}$ (Parking Wrap and Screening Requirements).
(ii) Along wide \#street\# frontages

For \#buildings\# with a \#street wall\# width exceeding 100 feet along a \#street\# frontage, at least 100 feet of such frontage shall comply with the provisions of paragraph (b)(2)(i) of this Section. For portions in excess of 100 feet, \#accessory\# off-street parking spaces on the ground floor level shall be wrapped or screened in accordance with Section 26-54. However, the aggregate width of any such screening, excluding entrances and exits, shall not exceed 50 feet.

## (c) Setback requirements

For all \#Quality Housing buildings\#, a setback shall be provided in accordance with the following regulations:
(1) At a height not lower than the minimum base height or higher than the maximum base height specified for the applicable district in paragraph (b) of this Section, a setback with a depth of at least 10 feet shall be provided from any \#street wall\# fronting on a \#wide street\#, and a setback with a depth of at least 15 feet shall be provided from any \#street wall\# fronting on a \#narrow street\#.
(2) The depth of such required setback may be reduced by one foot for every foot that the \#street wall\# is located beyond the \#street line\#, but in no event shall a setback of less than seven feet in depth be provided, except as otherwise set forth in this Section. To allow \#street wall\# articulation, where a \#street wall\# is divided into different segments and located at varying depths from the \#street line\#, such permitted setback reduction may be applied to each \#street wall\# portion separately.
(3) Notwithstanding the provisions of paragraph (c)(2) above, the depth of such setbacks may include the depth of recesses or \#outer courts\# in the \#street wall\# of the \#building\# base, provided that the aggregate width of any such recessed portion of a \#street wall\# with a setback less than seven feet, as applicable, does not exceed 30 percent of the \#aggregate width of street wall\# at any level.
(4) These setback provisions are optional for any \#building\# wall that either is located beyond 50 feet of a \#street line\#, or oriented so that lines drawn perpendicular to it, in plan, would intersect a \#street line\# at an angle of 65 degrees or less. In the case of an irregular \#street line\#, the line connecting the most extreme points of intersection shall be deemed to be the \#street line\#. Furthermore, dormers provided in accordance with the provisions of Section 23-621 (Permitted obstructions in certain districts) may penetrate a required setback area.
(5) In R9D Districts, for \#buildings or other structures\# on \#zoning lots\# that front upon an elevated rail line, at a height between grade level and 25 feet, a setback with a depth of at least 20 feet shall be provided from the \#street line\# fronting on such elevated rail line. The depth of such setback may be reduced by one foot for every foot that the depth of the \#zoning lot\#, measured perpendicular to the elevated rail line, is less than 110 feet, but in no event shall a setback less than 10 feet in depth be provided.
