## 37-21 - Special at-grade Screening and Enclosure Regulations

---

†

LAST AMENDED  
12/6/2023

---

In all districts, other than C8 Districts, all #energy infrastructure equipment# and #accessory# mechanical equipment located below the rooftop level, other than solar or wind energy systems or equipment with a depth limited to 18 inches from an exterior wall, shall be subject to the following provisions when not located within a #completely enclosed building#, whether or not such equipment is located within a required #open space#, #yard#, or #court#:

- (a) all generators and cogeneration equipment utilizing fossil fuels which are #accessory# to #buildings# other than #single-# or #two-family# #residences# shall be completely enclosed within a #building or other structure#, except as necessary for mechanical ventilation;
- (b) all other types of equipment, including generators and cogeneration equipment serving #single-# or #two-family# #residences#, may be unenclosed, provided that such equipment is located at least five feet from any #side# or #rear lot line# and where located between a #street wall#, or prolongation thereof, and the #street line#, such equipment is within three feet of a #street wall#; and
- (c) where the area bounding all such equipment, as drawn by a rectangle from its outermost perimeter in plan view, exceeds 25 square feet, such equipment shall be screened in its entirety on all sides. Such screening may be opaque or perforated, provided that where perforated materials are provided, not more than 50 percent of the face is open.

---

## 37-22 - Special Rooftop Screening and Enclosure Regulations

---

†

LAST AMENDED  
12/6/2023

---

In all districts, all #energy infrastructure equipment# and #accessory# mechanical equipment located on roofs, other than solar energy systems, shall be subject to the following provisions when not located within a #completely enclosed building#, whether or not such equipment is penetrating a maximum height limit or a #sky exposure plane#.

All such equipment shall be screened on all sides. Such screening may be opaque or perforated, provided that where perforated materials are provided, not more than 50 percent of the face is open.
