73-622 - Bulk modifications for certain residential buildings on irregular sites

LAST AMENDED

12/5/2024

For #developments# or #enlargements# of #buildings#, except #sky exposure plane buildings#, in which at least 50 percent of the #dwelling units# either comply with the definition of “affordable housing unit” set forth in Section [27-111](#) (General definitions), or have a legally binding restriction limiting rents to households with incomes at or below 80 percent of the #income index#, as prescribed by a City, State or Federal agency, law regulation, or regulatory agreement, for a period of not less than 30 years, or at least 50 percent of its total #floor area# is a #long-term care facility# or philanthropic or non-profit institution with sleeping accommodation, the Board of Standards and Appeals may modify the underlying #bulk# regulations, other than #floor area ratio# or the maximum height of #buildings# or other #structures#, and provided that the Board finds that:

- (a) there are physical conditions, including irregularity, narrowness or shallowness of lot size or shape, or topographical features that create practical difficulties in complying with the #bulk# regulations and would adversely affect the #building# configuration or site plan;
- (b) the practical difficulties of developing on the #zoning lot# have not been created by the owner or by a predecessor in title;
- (c) the proposed modifications will not unduly obstruct access of light and air to adjoining properties or #streets#;
- (d) the proposed scale and placement of the #development# or #enlargement# relates harmoniously with the surrounding area; and
- (e) the requested modification is the least amount necessary to relieve such practical difficulties.

The Board may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area.
