73-66 - Height Regulations Around Airports

LAST AMENDED

7/23/1964

The Board of Standards and Appeals may permit the construction, #enlargement#, or reconstruction of a #building or other structure# in excess of the height limits established under Sections [61-21](#) (Restriction on Highest Projection of Building or Structure) or [61-22](#) (Permitted Projection Within any Flight Obstruction Area), provided that the applicant submits a site plan, with elevations, showing the proposed #building or other structure# in relation to such maximum height limits, and that the Board finds that such proposed #building or other structure#, #enlargement#, or reconstruction would not constitute a hazard (either under the existing layout of the airport or under any planned reorientation or lengthening of the airport runways) to the safety of the occupants of such proposed #building#, to other #buildings# in the vicinity or to the safety of air passengers, and would not disrupt established airways.

The Board shall refer the application to the Federal Aviation Administration for a report as to whether such construction will constitute a danger to the safety of air passengers or disrupt established airways.
