62-57 - Requirements for Supplemental Public Access Areas

LAST AMENDED

4/22/2009

- 
- (a) If the aggregate area of the required #shore public walkways#, #upland connections#, public access areas on #piers#, and public access areas in conjunction with #floating structures# on the #zoning lot#, is less by 750 square feet or more than the amount of #waterfront public access area# required by the table in this Section, then #supplemental public access areas# shall be provided in order to meet the total amount of #waterfront public access area# required by the table. However, when a #zoning lot# is #developed# #predominantly# as a playground or publicly accessible private park, the requirements of this Section shall be deemed to be satisfied by such #use#.
- (b) Where #supplemental public access areas# are required within New York State-designated wetlands or adjacent State-regulated areas, the area requirements and the design standards for such #supplemental public access areas# may be reduced or modified by the New York State Department of Environmental Conservation.
- #Supplemental public access areas# shall not be required where the total area of such designated wetlands and adjacent State-regulated areas on the #zoning lot# is equal to or greater than the total #supplemental public access area# requirement and the Department of Environmental Conservation determines that public access to such areas is not permitted.
- (c) Whenever a #zoning lot# is divided by a boundary between districts in which different thresholds apply pursuant to the table in this Section, the #waterfront public access area#

requirement shall be met for the entire #zoning lot#, provided that:

- (1) the #lot area# or length of #shoreline# in either district is less than the minimum threshold for which there is a total #waterfront public access area# requirement; and
- (2) the total #lot area# or length of #shoreline# for the entire #zoning lot# is greater than the lowest threshold in either district for which there is a total #waterfront public access area# requirement.

Each portion of the #zoning lot# shall generate a total #waterfront public access area# requirement based on the percentage required in the table for the district in which it is located.

WATERFRONT PUBLIC ACCESS AREA REQUIREMENTS

Districts	#Zoning Lot# Threshold	Total #Waterfront Public Access Area# Requirement as a Percentage of #Lot Area#
R3, R4, R5,	#Lot area#: 65,340 sq. ft.	15
C1 or C2 in R1-R5	#Shoreline# length: 600	
C3, C4-1	ft.	

R6, R7-1, R7-2, R7A, R7B, R7D, R8B	#Lot area#: 20,000 sq. ft.	15
---------------------------------------	-------------------------------	----

and #Commercial Districts# governed by the #bulk# regulations of such #Residence Districts#	#Shoreline# length: 100 ft.
--	--------------------------------

All other #Commercial# or
#Manufacturing Districts#
with a permitted
#commercial# FAR of 4.0 or
less

Other R7, R8, R9, R10, R11, R12 Districts and #Commercial Districts# governed by the #bulk# regulations of such #Residence Districts#	#Lot area#: 20,000 sq. ft. #Shoreline# length: 100 ft.	20
--	--	----

All other #Commercial# or
#Manufacturing Districts#
with a permitted
#commercial# FAR above 4.0

A #supplemental public access area# shall also be subject to the provisions of Section [62-62](#) (Design Requirements for Shore Public Walkways and Supplemental Public Access Areas).

62-571 - Location and area requirements for supplemental public access areas

LAST AMENDED

4/22/2009

#Supplemental public access areas# shall adjoin a #shore public walkway# in accordance with the requirements of this Section, except as modified by paragraphs (a) and (b) of Section [62-57](#), and the provisions of this Section:

- (a) The minimum area of the #supplemental public access area#:
 - (1) when located at the intersection of a #shore public walkway# and an #upland connection# or #street#, shall be 750 square feet, have a minimum width to depth ratio of 1:1 and a maximum width to depth ratio of 3:1. The longest side shall adjoin the #shore public walkway#; or
 - (2) when located adjoining a #shore public walkway# without adjoining an #upland connection# or #street#, shall be 1,875 square feet and have a minimum width to depth ratio of 3:1. The minimum depth perpendicular to the #shore public walkway#, as a weighted average, shall be 25 feet.

The width to depth requirements of paragraphs (a)(1) and (a)(2) of this Section may be satisfied with weighted average dimensions. The minimum angle between the two boundary lines of a #supplemental public access area# coinciding with the private portion of the #zoning lot# shall be 90 degrees.

- (b) A #supplemental public access area# may be provided:

- (1) to widen the #shore public walkway#, with a minimum width of 10 feet running continuously along the #shore public walkway# between any two of the following: an #upland connection#, open #street#, #public park# or other public place;
- (2) as a pedestrian sidewalk area abutting a roadbed running along the #shoreline#, provided such sidewalk has a minimum width of 13 feet and complies with the provisions for a Type 2 #upland connection# pursuant to Section [62-64](#). Any additional #supplemental public access area# shall comply with the requirements of this Section; or
- (3) as a dedicated bicycle path if such path connects at each end to an open #street#. The minimum width of a bicycle path shall be 10 feet, with an additional two foot clearance on each side along the entire length of the path. There shall be a planted area between a bicycle path and a paved area for pedestrian use, pursuant to the requirements of paragraph (c) of Section [62-62](#).
