## 78-313 - Findings

---

LAST AMENDED

10/25/1993

As a condition precedent to the granting of authorizations under the provisions of Section [78-311](#) (Authorizations by the City Planning Commission) or a special permit under the provisions of Section [78-312](#) (Special permits by the City Planning Commission), the Commission shall make the following findings:

- (a) that such modifications will aid in achieving the general purposes and intent of this Chapter as set forth in Section [78-01](#) (General Purposes);
- (b) that such distribution of #floor area#, #dwelling units#, #rooming units#, #open spaces#, locations of #buildings#, or location of primary business entrances, #show windows# or #signs# will permit better site planning and will thus benefit both the residents of the #large-scale residential development# and the City as a whole;
- (c) that such distribution or location will not unduly increase the #bulk# of #buildings#, density of population, or intensity of #use# in any #block#, to the detriment of the occupants of #buildings# in the #block# or nearby #blocks#;
- (d) that such distribution or location will not affect adversely any other #zoning lots# outside the #large-scale residential development# by restricting access to light and air or by creating traffic congestion;
- (e) where portions of the total required #open space# are pooled in common #open space# areas or common parking areas, that such common areas will, by location, size, shape and other physical characteristics, and by their relationship to surrounding development and the circulation system, permit realization of the full community service of advantages for which such pooled areas are designed;
- (f) where one or more #zoning lots# in the #large-scale residential development# do not #abut# mapped #streets#, that suitable private access to mapped #streets# will be provided conforming to standards which will ensure adequate circulation and make adequate provision for public services; and
- (g) the modification of height and setback will not impair the essential character of the surrounding area and will not have adverse effects upon the access to light, air and privacy of adjacent properties.
