At the stations specified below, the transit easement required on a #zoning lot# shall constitute a volume whose dimensions above and below #curb level# shall comply with the requirements as set forth in Table A or Table B of this Section, depending on the depth of the proposed subway mezzanine below #curb level#, as established by the Metropolitan Transportation Authority.

Type 1 is appropriate on #zoning lots# of less than 10,000 square feet with adequate lot frontage and where the Metropolitan Transportation Authority provides final access to the subway mezzanine level under a public right-of-way.

(95-031.1)

Type 2 is appropriate on any size #zoning lot# for providing direct access to the subway mezzanine level by a "straight run" stairway and/or escalator.

(95-031.2)

Type 3 is applicable to #zoning lots# of 10,000 square feet or more for providing a "turn around" arrangement of stairs.

(95-031.3)

Types 4 and 5 are limited to #zoning lots# of less than 10,000 square feet with a narrow lot frontage for a single "straight-run" transit access facility, such as an escalator or stairway.

(95-031.4)

(95-031.5)

Type 6 is appropriate on #zoning lots# of less than 10,000 square feet for providing a "turn around" arrangement of stairs.

(95-031.6)

Where appropriate, any of these easement types may be used exclusively for light wells.

The Metropolitan Transportation Authority and the Commission, in consultation with the applicant, may make minor modifications of the dimensions of the easement volume type required on the applicant's site and the spacing of #building# columns permitted within the easement volume to facilitate the design and construction of circulation facilities appropriate for the area.
