109-131 - Building facades

LAST AMENDED

2/2/2011

The front #building# wall of any #building# shall extend along the full length of its #front lot line# not occupied by existing #buildings# to remain and shall rise without setback up to a height of six #stories# or 65 feet, or the height of the #building#, whichever is less. Above that height, the front #building# wall shall set back at least 10 feet. Front wall recesses are permitted provided that the aggregate length of such recesses, excluding window fenestration, at the level of any #story# does not exceed 25 percent of the length of the front wall where such recesses are permitted. In the event that a #development# occupies an entire #block# frontage, additional recesses are permitted provided that there are no front wall recesses within 10 feet of the intersection of two #street lines#. The exterior #building# materials of the front wall shall be predominantly of masonry.
