Where the designated #Residence District# is an R6 through R12 District, the applicable #street wall# location provisions of this Section shall apply. Such provisions shall apply to the portion of a #street wall# located below the maximum base height and before the required setback as set forth in Section [123-652](#) as applicable.

(a) Percentage-based rules

At least 70 percent of the #aggregate width of street walls# shall be located within eight feet of the #street line# and shall extend to at least the minimum base height specified in Section [123-652](#) or the height of the #building#, whichever is less. Up to 30 percent of the #aggregate width of street walls# may be recessed beyond eight feet of the #street line#, provided that any such recesses deeper than 10 feet along a #wide street# or 15 feet along a #narrow street# are located within an #outer court#.

However, where the #street walls# surrounding the subject #building# are located on a #block# with a #prevailing street wall frontage# that is located further from the #street line# than the applicable provisions of this paragraph, the line-up provisions of paragraph (a) of Section [23-431](#) may be applied.

(b) Modifications for large #zoning lots#

Notwithstanding the provisions of paragraphs (a) of this Section, for #street walls# on #buildings# on a #zoning lot# that has a #lot area# of at least 40,000 square feet or that occupy an entire #block#, at least 70 percent of the #aggregate width of street walls# shall be located within 15 feet of the #street line# and extend to at least the minimum base height specified in Section [123-652](#), or the height of the #building#, whichever is less.

(c) Articulation allowances

In all districts, and along all frontages, #street wall# articulation, including, but not limited to, window recesses and structural expression on the #building# facade, shall be permitted to project or recess beyond the #street wall# locations established in paragraphs (a) or (b) of this Section, provided that such articulation does not exceed a depth or projection of 12 inches. In addition, to accommodate other forms of #street wall# articulation, such as bay windows, and facade recesses, up to 50 percent of the #aggregate width of street wall#, at any level, may recess or project beyond such #street wall# location provisions of this Section, provided that no such recess or projection exceeds a depth of three feet, as measured perpendicular to the #street wall#, or portion thereof. No projection shall extend beyond the #street line#, except where encroachments into the public right-of-way are permitted by the New York City Administrative Code.

For portions of a #building# #street wall# that exceed the maximum base height, a setback shall be provided at a height not lower than the minimum base height or higher than the maximum base height, in accordance with Section [23-433](#) (Standard setback regulations).

However, for M1 Districts with an A suffix paired with a #Residence District#, the applicable height and setback regulations for the district shall be whichever regulations permit the tallest overall heights between the height and setback regulations applicable to the particular #Manufacturing District# set forth in the table in Section [43-46](#) (Height and Setback Provisions for Districts With an A Suffix), or the height and setback regulations applicable to the particular #Residence District# set forth in Section [23-432](#). In either case, for #zoning lots# with a #lot area# greater than or equal to 20,000 square feet, a #building# may exceed the maximum #building# heights established in such tables by 25 percent.

(b) Districts without a letter suffix

Where the designated #Residence District# is an R6 through R12 District without a letter suffix, the minimum base height, maximum base height and maximum #building# height shall be as set forth in the following table. For portions of a #building# #street wall# that exceed the maximum base height, at a height not lower than the minimum base height or higher than the maximum base height, a setback shall be provided in accordance with Section [23-433](#).
