      (ii) is located above the #base plane# or #curb level#, as applicable, and below the highest #story# containing #residential floor area#; and

      (iii) exceeds an aggregate height of 25 feet within any given 75 vertical feet of one another within a #building#.

For the purpose of applying this provision, the height of such floor space shall be measured from the top of a structural floor to the bottom of a structural floor directly above such space. In addition, the number of #stories# of #floor area# such space constitutes within the #building# shall be determined by aggregating the total height of such floor spaces, dividing by 25 feet, and rounding to the nearest whole integer.

(ii) Where an existing #building# on an adjacent #zoning lot# is located less than eight feet from, but not on, the common #side lot line#, a #side yard# at least four feet wide is required.
