23-24 - Special Provisions for Buildings Containing Multiple Uses

LAST AMENDED

3/22/2016

R1 R2 R3 R4 R5 R6 R7 R8 R9 R10

In all districts, as indicated, for #zoning lots# with #buildings# containing multiple #uses# or multiple #buildings# with different #uses#, the maximum number of #dwelling units# permitted on the #zoning lot# shall equal the maximum #residential# #floor area# permitted on the #zoning lot#, divided by the applicable factor in Section [23-22](#) (Maximum Number of Dwelling Units). For the purposes of such calculation, the maximum #residential# #floor area# permitted on the #zoning lot# shall equal the applicable total #floor area# permitted on the #zoning lot#, minus the amount of non-#residential# #floor area# and #floor area# allocated to #affordable independent residences for seniors#. Where #floor area# in a #building# is shared by multiple #uses#, the #floor area# for such shared portion shall be attributed to each #use# proportionately, based on the percentage each #use# occupies of the total #floor area# of the #zoning lot#, less any shared #floor area#.

Illustrative Examples

The following examples, although not part of the Zoning Resolution, are included to demonstrate the application of density regulations to #buildings# or #zoning lots# containing multiple #uses#.

For a 25,000 square foot #zoning lot# outside a #predominantly built-up area# of an R5 District, the owner is looking to construct two #buildings# of similar size — one that is a mix of #affordable independent residences for seniors# and #community facility# #uses# and one that is exclusively #residential uses# other than #affordable independent residences for seniors#. For this #zoning lot#, the maximum permitted #community facility# FAR is 2.0, the maximum permitted FAR for #affordable independent residences for seniors# is 1.95 and the maximum permitted FAR for other #residential uses# is 1.25, provided the total FAR for all #uses# on the #zoning lot# does not exceed 2.0, pursuant to Section [23-14](#). If this #zoning lot# is #developed# with 0.25 FAR of #community facility# #use# and 0.75 FAR of #affordable independent residences for seniors#, the maximum #residential# #floor area ratio# for #residences# other than #affordable independent residences for seniors# permitted for the #residential building# is 1.0. The maximum number of #dwelling units# permitted on the #zoning lot# is 33 (25,000 x 1.0 divided by a factor of 760, pursuant to Section [23-22](#)).

For a 10,000 square foot #zoning lot# in an R8A District, the owner is looking to construct a #building# with a mix of #community facility# and #residential uses#. For this #zoning lot#, the maximum permitted #community facility# FAR is 6.5 and the maximum permitted FAR for #residential uses# is 6.02, provided the total FAR for all #uses# on the #zoning lot# does not exceed 6.5, pursuant to Section [23-15](#). If this #zoning lot# is #developed# with 1.0 FAR of #community facility# #use#, the maximum #residential# #floor area ratio# permitted for such #building# is 5.5. The maximum number of #dwelling units# permitted on the #zoning lot# is 81 (10,000 x 5.5 divided by a factor of 680, pursuant to Section [23-22](#)).
